

Houston Area Calculus Teachers Workshop

September 19, 2020

Presenter: Dixie Ross

Handout 1: **Are we asking the right questions?**

I stupidly saved the wrong version of the handout and the numbers in the chart didn't match the conditions I had put forth. SORRY! The corrected version will be posted to

www.HoustonACT.org

Handout 2: **One graph with multiple uses**

There were some minor edits on this as well.

Handout 3: **A problem for our time**

Again, minor edits here

Handout 4: **You're not wrong, BUT . . .**

Remember that what is posted are the BAD answers! There is nothing wrong BUT there's not enough there to get credit on the AP exam. The point of the exercise is to make them GOOD answers by adding to them.

In previous years, (check out the speaker archives!) I have shared quite a few matching games and I have converted many of those to Desmos activities to be used in the online environment that many of us are in. Here is a link to my collection.

<https://teacher.desmos.com/collection/5eee552df32395782bcec75f>

Spend some time poking around the Houston Area Calculus Teachers website and notice all of the great stuff they have for teachers to make our lives easier (videos, powerpoints, online quizzes, handouts from **20 years** of workshops!)

It's been an honor to be part of this group and we're glad that you were able to join us! Remember that Cedric French has a great talk coming up on November 7! Tell all of your friends! **Cedric French**

Connecting Pre-Calculus and Calculus

Thanks again everyone! I hope you got some new ideas and I look forward to seeing you in September 2021!
